ABOUT AGENT

Agent Johnny Red is a superhero whose mission is to save humans from their enslavement. His mission starts by spreading the word about the enslavement system of 440hz music. His album *Run Against the Sequence* and his EP *Hack the Sequence* show the dilemmas about recording in 440hz. No matter what music is in 440hz, it will never truly liberate a Soul from the sequences and programs in the mind.

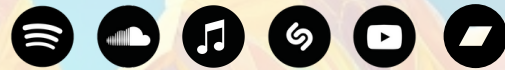

With his latest singles, "We've Already Won", "All The Light Codes", and his latest release "This Moment", Agent introduces his listeners to the 432hz frequency in order to help lift people up out of their programmed minds and lower energy centers, back into alignment with their heart space and upper energy centers.

He is also currently doing live meditation music, performing electronic and acoustic sets at the Community Barn in Maine where he is helping to uplift people and share the message of Love and Unity. Agent will soon begin releasing podcasts through his production company, Silver Horse Productions.

LISTEN TO MY MUSIC

You can listen to my music on most major music platforms as well as on YouTube.
